1. Appendix A – Run a VNC session

1.1 Configure

Run NX Connection Wizard.

Insert the name of session, for example "VNC on my Host", host name and port of NX Server. Select the speed of your Internet connection. ADSL should be OK in most cases, but you can select MODEM or ISDN if you have a slow link. Now click "Next".

Insert name of the session. Your configuration settings will be saved with this name.

Session

Insert server's name and port where you want to connect.

Host Port

Select type of your internet connection.

MODEM
 ISDN
 ADSL
 WAN
 LAN

Choose "VNC" from first select.

Using NX Client you can run RDP, VNC and X desktops, depending on what the service provider has made available.

Select size of your remote desktop.

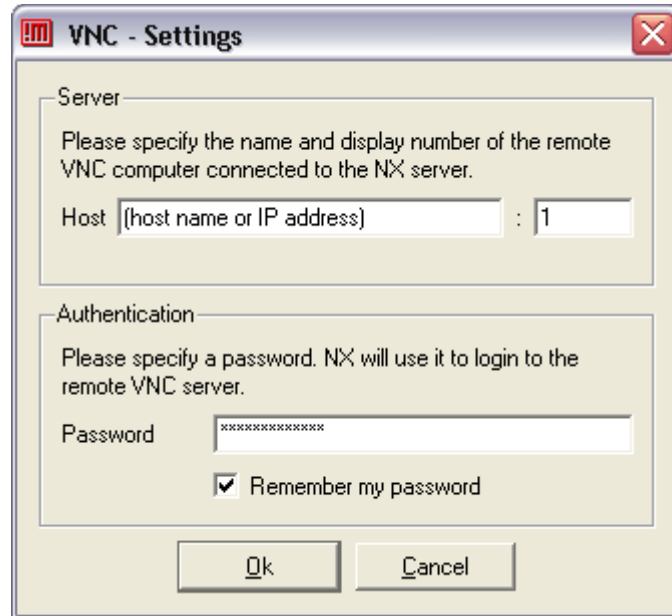

W:
 H:

Authorization credentials are always encrypted at the time connection is established. For increased security, you can enable the following option.

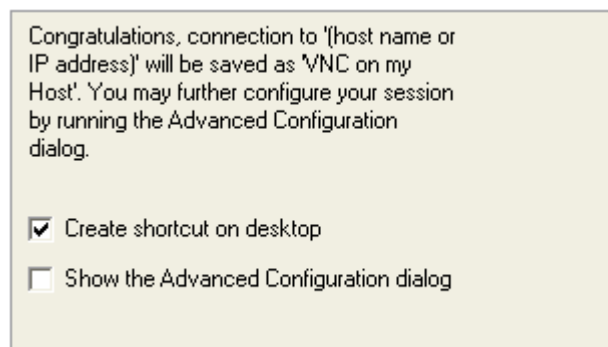

Disable SSL encryption of all traffic

Insert the host name and password of VNC Server and click "OK".
