PART FIVE-Open A New Text Document	25
Open A New Text Document Instructions And Image	25

This document contains the images that are often used when writing tutorials. The images are anchored “As Character”. The images are divided into parts. Part One is **Toolbars** with images of the different toolbars with the icons below. Part Two is **Other Icons** which contains miscellaneous icons. Part Three is **Other Images** which contains some images that you may find useful. Part Four is **Navigator** which has icons with explanations of their use that appear in the Navigator window. Part Five is **Open A New Text Document** which contains the instructions and the image of the blue line that appears when you open a new text document. Click [here](#) to download this document. Save the document in a convenient place for you.

How To Insert The Images In Your Document

1. Open the **Authors Resources-Images** document
2. Open a new document to write your tutorial
3. Begin writing your tutorial
4. Do one of the following:
 - (a) Right-click on the image in the **Authors Resources-Images** that you will use.
(A menu will appear.)
 - (b) Click **Copy**.
 - (c) Go to your document and click where you want the image then right click on your document. (A menu will appear.)
 - (d) Click **Paste**.
 - (e) The image is now in your document.

Or

- (a) Click on the image in the **Authors Resources-Images** that you want to use.
- (b) Click the **Copy**  icon on the **Standard Toolbar**.
- (c) Go to your document and click where you want the image then click the **Paste**  icon .
- (d) The image is now on your document.

Add/Delete Spaces Between Image And Text

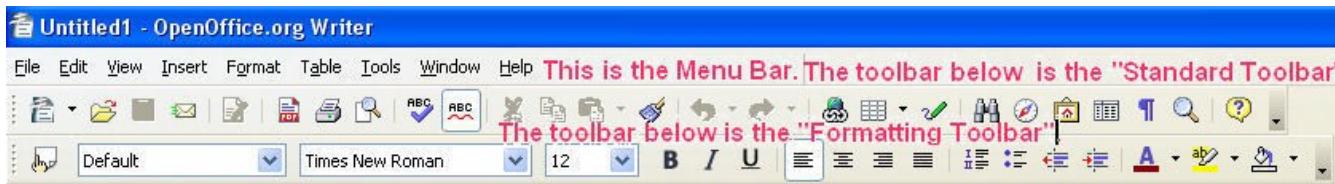

The images are saved As Character and can be moved up or down on your line of text. After insertion, you may delete spaces by clicking the Del key or add spaces by clicking the space bar between the image and your text.

Image Too Large Or Too Small

If the image is too large, there will be additional space between your lines of text. To correct this:

1. Click on the image. (The green handles will appear.)
2. Place your pointer on one of the handles.
3. Hold down the Shift key and drag to make the image smaller.

PART FOUR - NAVIGATOR

Window

Navigator Icons

Anchor < > Text

The **Anchor < > Text** icon

Jumps between the footnote text and the footnote anchor.

Content View

The Content View 

Open a category by clicking on the plus sign. If you only want to view the entries in a certain category, select the category and click the **Content View** icon. Until you click the icon again, only the objects of this category will be displayed.

Switches between the display of all categories in the Navigator and the selected category.

Switches between master view and normal view if a master document is open.

Demote Chapter

The Demote Chapter 

Moves the selected heading, and the text below the heading, down one heading position in the Navigator and in the document. To move only the selected heading and not the text associated with the heading, hold down Ctrl, and then click this icon.

Demote Level

The Demote Level 

Decreases the outline level of the selected heading, and the headings that occur below the heading, by one. To only decrease the outline level of the selected heading, hold down Ctrl, and then click this icon.

Drag Mode

The Drag Mode 

Sets the drag and drop options for inserting items from the Navigator into a document, for example, as a hyperlink. Click this icon, and then choose the option that you want to use.

Edit

The **Edit**  icon

Edit the contents of the component selected in the Navigator list. If the selection is a file, the file is opened for editing. If the selection is an index, the index dialog is opened.

Footer

The **Footer**  icon

Moves the cursor to the footer, or from the footer to the document text area.

Header

The **Header**  icon

Moves the cursor to the header, or from the header to the document text area.

Heading Level Shown

The **Heading Level Shown**  icon

Click this icon, and then choose the number of heading outline levels that you want to view in the Navigator window.

Insert

The **Insert**  icon

Inserts a file, an index, or a new document into the master document.

List Box On/Off

The **List Box On/Off**  icon

Shows or hides the Navigator list.

Move Down

The **Move Down**  icon

Moves the selection down one position in the Navigator list.

You can also move entries by dragging and dropping them in the list. If you move a text section onto another text section, the text sections are merged.

Move Up

The **Move Up**  icon

Moves the selection up one position in the Navigator list.

You can also move entries by dragging and dropping them in the list. If you move a text section onto another text section, the text sections are merged.

Navigation

The **Navigation**  icon

Opens the Navigation toolbar, where you can quickly jump to the next or the previous item in the category that you select. Select the category, and then click the "Previous" and "Next" arrows.

Navigator

The Navigator  icon

Shows or hides the Navigator, where you can quickly jump to different parts of your document. You can also use the Navigator to insert elements from the current document or other open documents, and to organize master documents.

Next Page

The Next Page  icon

Jumps to the next item in the document. To specify the type of item to jump to, click the Navigation icon, and then click an item category - for example, "Graphics".

Previous Page

The Previous Page  icon

Jumps to the previous item in the document. To specify the type of item to jump to, click the Navigation icon, and then click an item category - for example, "Graphics".

Promote Chapter

The Promote Chapter  icon

Moves the selected heading, and the text below the heading, up one heading position in the Navigator and in the document. To move only the selected heading and not the text associated with the heading, hold down Ctrl, and then click this icon.

Note: To move the heading without the subordinate text, hold down **Ctrl** while you drag or click the **Promote Chapter** or **Demote Chapter** icons.

Promote Level

The **Promote Level**  icon

Increases the outline level of the selected heading, and the headings that occur below the heading, by one. To only increase the outline level of the selected heading, hold down **Ctrl**, and then click this icon.

Save Contents as well

The **Save Contents as well**  icon

Saves a copy of the contents of the linked files in the master document. This ensures that the current contents are available when the linked files cannot be accessed.

Set Reminder

The **Set Reminder**  icon

Click here to set a reminder at the current cursor position. You can define up to five reminders. To jump to a reminder, click the Navigation icon, in the Navigation window click the Reminder icon, and then click the Previous or Next button.

Toggle

The **Toggle**,  icon

Switches between master view
and normal view if a master
document is open.

Update

The **Update**  icon

Click and choose the contents
that you want to update.

Click and choose the contents that you want to update. To update an index in a master document, select the index in the Navigator, and then click the **Update** icon.

Update All Links Message

PART FIVE-Open A New Text Document

Open A New Text Document Instructions And Image

Click **File > New > Text Document**. (The  Untitled1 - OpenOffice.org Writer document appears.)
